

Life Insurance Actuary Job Description - Template

We are looking for a talented and dedicated Life Insurance Actuary to join our team. The ideal candidate will be an Associate or Fellow Actuary and have relevant experience in the life insurance industry. They must possess a high level of attention to detail and strong problem-solving skills. If you are an actuary with excellent technical and communication skills, we welcome your job application.

Key Responsibilities

- Manage potential financial risks associated with life insurance policies
- Gather and analyse statistical data to predict mortality and disability rates
- Determine pricing and reserving for life insurance products
- Assess the financial stability of the life insurance company
- Develop and implement risk management strategies
- Effectively communicate findings to a non-technical audience
- Working with various stakeholders in the insurance chain

Requirements

- 3+ years in life insurance pricing or reserving
- Good understanding of the life insurance ecosystem and its various stakeholders
- Ability to work quick and agile
- Proficiency in data analysis and modelling software
- Management experience is an advantage

Qualifications

- A Bachelor's degree in Mathematics, Actuarial Science, or Business
- Associate (partly qualified) or Fellow (fully qualified) Actuary
- Full command of Office tools (Word, Powerpoint, Excel)
- Experience with VBA, Prophet and Python
- Leadership, communication and technical skills are essential
