

Pricing Actuary Job Description - Template

We are looking for a talented and dedicated Pricing Actuary to join our team. The ideal candidate will possess an honours degree in actuarial science, mathematics or a related field and have relevant experience in the industry. They must possess a high level of attention to detail and strong problem-solving skills. If you are an actuary with excellent technical and communication skills, we welcome your job application.

Key Responsibilities

- Analyzing data and trends
- Developing pricing models
- Setting pricing for insurance products
- Monitoring performance and reviewing experience
- Effectively communicate findings to a non-technical audience
- Creating business plans, financial projections and budgeting
- Assessing the financial impact of potential business decisions
- Working with various stakeholders in the insurance chain

Requirements

- 3+ years in insurance pricing and product development
- A degree or postgraduate diploma in actuarial science
- Good understanding of the insurance ecosystem and its various stakeholders
- Can-do attitude and the ability to take ownership of projects
- Management experience is an advantage

Qualifications

- A Bachelor's degree in Mathematics, Actuarial Science, or Business
- Partly or fully qualified Actuary
- Full command of Office tools (Word, Powerpoint, Excel)
- Experience with VBA, Prophet and Python
- Leadership, communication and decision-making skills are essential
